

ON-SITE TRAINING – 2019 PRICE LIST

Aqueous Solutions can present either or both of two training courses at your site. When you consider travel expenses and the value of employee time, on-site training can offer significant benefits. The two courses are

- **Applied Geochemical Reaction Modeling**
- **Reactive Transport Modeling in Geochemical Systems**

Each course lasts two days, with about six hours per day spent in hands-on instruction and two hours reserved for review and one-on-one assistance. The instructor can in some cases stay one or more extra days, to spread out lessons, offer additional material, or provide further one-on-one instruction.

Approximate costs in U.S. dollars are as shown:

	2 days, 1-8 participants	Each add'l participant
At our offices in Champaign, IL	\$4000	
U.S. and Canada discounted (instructor returns to Champaign on second day)	\$4500	
U.S. and Canada	\$4900	\$300
The Americas	\$5900 – \$7900	
Europe	\$5900 – \$6900	
Asia, Australasia, and Africa	\$7900	
Extra days, each	\$2000	\$150

Responsibilities are as follows:

Aqueous provides course preparation, expert instructor, instructional materials printed in color, and a 60-day license to The Geochemist’s Workbench Professional® for each participant. Instructor will make travel arrangements once Aqueous receives advance payment of 50% of the estimated total cost.

Host provides a suitable classroom and reimburses the instructor’s actual travel expenses, including economy class airfare, ground transport, hotel, and meals. The host may be asked to arrange for local printing of course materials, at Aqueous’ expense. Each participant will need a laptop computer.

Please contact sales@gwb.com for details and a specific price quote.
